

XM has the right to give it's paying comtomers all local info ,even news!
It's an added survice we customer expect. I would like to add. I see this as
being no differrent than satellite TV
there customers get local channels,and no one is making a big fuss.
If any thing it is being imbraced. Maybe XM should offer local FM & AM
to it's customers,maybe every body would be satitfided.
